

Web Development Services by Prime ICT

Smart, Secure, and Scalable Websites That Grow With Your Business

Your website is more than just a digital business card—it's your 24/7 salesperson, your first impression, and often your most valuable marketing asset. At PrimeICT, we design and build custom websites that look great, work fast, and deliver real results.

From simple business websites to complex web applications, we deliver end-to-end solutions tailored to your brand, goals, and users.

Why Choose PrimeICT Web Development Services

Custom, Not Cookie-Cutter

Every website we build is tailored to your business needs.
No recycled templates.

Local Support, Global Standards

Based in Australia, with a commitment to excellence and ongoing support.

Business-Focused

We don't just build websites—we build digital platforms that help you win more customers.

Agile Development

Flexible, collaborative approach with clear timelines and deliverables.

SEO-Ready from Day One

Clean code, fast loading, and built-in SEO structure so your site performs.

Integrated Solutions

Need digital marketing, social media, or IT support too? We've got you covered.

What We Offer

Whether you're building from the ground up or need a redesign, we handle the entire web development process—strategy to support.

Custom Website Design

Unique, responsive designs built to reflect your brand and engage your audience.

Full-Stack Development

Front-end and back-end coding using the latest technologies and frameworks.

E-Commerce Development

Online stores that are secure, scalable, and optimised for conversion (Shopify, WooCommerce, etc.).

CMS Integration

User-friendly content management systems (WordPress, Joomla, Drupal) for easy updates and management.

Web Applications

Bespoke web-based software solutions tailored to your business processes.

Mobile Responsiveness

Optimised for all devices—desktop, tablet, and mobile—for the best user experience.

Speed & Performance Optimisation

Fast-loading pages and optimised code for better SEO and user retention.

SEO & Analytics Setup

On-page SEO fundamentals and analytics integration to help you track performance.

Security Best Practices

SSL, firewall integration, regular updates, and secure coding to protect your site and your users.

Ongoing Maintenance & Support

We don't disappear after launch. We provide updates, backups, monitoring, and peace of mind.
